

The website [link](#)

functional :

1. clicking on terms button, shows the 'contact page'
2. settings > profile > phone number > takes any character or any number of characters (more than 1)
3. settings > profile > website > takes any character or any number of characters (more than 1)
4. settings > profile > update button > (with invalid inputs) reloads the page
5. settings > profile > dob > takes future date
6. settings > profile > update button > (with invalid inputs) doesn't reload the page or doesn't clear the text fields
7. settings > profile > 'website' field takes any input (whether valid or invalid website)
8. clicking the logo doesn't refresh the page
9. settings > security > the 'update password' button doesn't refresh the page or doesn't clear the text fields
10. contact us > phone number > takes any character

ui :

1. security settings > no old password check option
2. profile settings > dob alignment
3. while being in contact page, if 'terms' button is clicked, the 'Contact Us' button remains 'not selected'
4. markets > the columns of table being shown without data or selecting any market
5. markets > table columns are not correctly aligned for every option
6. markets > the whole page is center aligned but the last section isn't
7. settings > the 'profile' button isn't selected but the profile info is shown
8. settings > the word 'salutation' doesn't match the including options
9. settings > the alphabetical pattern doesn't match for every Labels or Header (ex : First name, Last Name, here the 'N' should be capital in both but isn't)
10. While redirecting from one page to another page, the UI doesn't start from the top
11. Slideshow images are not correctly sized (all images should be of same size)
12. The 3rd image of the slideshow is too large, it takes much longer to load
13. Homepage > sections are not aligned same (one is center aligned and other is left aligned)
14. Slideshow images get overflowed when zoomed in or out
15. Background of Contact Us page doesn't match with the content
16. In some mobile devices (ex : Pixel 5)
 - settings > dropdown overflows
 - security > footer alignment isn't right
 - After clicking on the menu button, the menu is shown, but it doesn't fade away while clicking on somewhere else at the website
17. in tab devices
 - Settings > Security > footer alignment isn't right
 - Contact Us > footer alignment isn't right
